

Boutique Loop Bow

Measure 2 pieces of 7/8" ribbon about 8" long. And 2 pieces of 7/8" ribbon 6" long. This is for a double Boutique Loop Bow. This is equally beautiful as a single loop bow. You can add even 6 loops! Have fun experiment! I've made these bows in one of my favorite ribbons! Pink and white with silver lurex threads running through it!

Take your 2 - 6" pieces of ribbon and form bows, clinch in the center and secure tightly with a wire.

Take your 8" ribbons and cut each side on an angle.

Add *one* bow on top of *one* ribbon that you have cut on an angle. Isn't it pretty just like that? :)

If you want to go for a double loop bow. Take your ribbon bow and secure it to the other ribbon bow with wire.

Now add on the other tail that you have cut on an angel!

Pretty huh? :) Here's where some fun begins! You can add on some more loops! You can add buttons in the center of the bow or korker

ribbons, a korker ribbon bow, krinkle ribbon, rosettes, bow resins, pins! Almost anything that you can think of! On the double loop Boutique bow I've added a button that says "Baby girl" I think it looks so cute! :)
