

Dragonfly

Measure 10" of 1" ribbon in red grosgrain ribbon. Measure 8" of 1/2" pink grosgrain ribbon.

Clinch your bows in the center and secure them with wire.

Take some wire and run it through the red wings of your Dragonfly so that you can secure them to the pink wings. See the wire underneath hanging there?

Put your red wings on top of your pink wings, twist and secure your wires well to your wings. Take 9" of red krinkle ribbon fold in half and twist the two pieces together. Take a few lil piece of wire, about 3 pieces will do it. Now randomly wrap a piece around the krinkle ribbon body of the Dragonfly so that the twisting of his body will hold together. Do that two more times. Now glue the Dragonflies body onto his wings.

Add a pink pom pom for a face and some eyes. Now take a piece of red ribbon approx. 2" long turn your Dragonfly over and glue it on the wings. You are doing this to help further secure the wings and give the body some stability. Glue your Dragonfly onto a lined French Clip. Fluff up his lil antenna on his head and there you go! Isn't he cute? hehe.
