

Classic Hairbow

Measure 22" of ribbon of your choice. Take your ribbon between your thumb and forefinger leave one inch hanging. Make a 2" loop. If you would like tails on this bow measure 24" ribbon instead of 22" and leave 2"s or so hanging before you start your bow. NOTE: I am using 7/8" grosgrain ribbon. Any length width is good for this bow.

Take your ribbon and make another loop opposite from the first loop.

Make a third loop by bringing the long part of your ribbon up and tuck it under the loop. Make your last loop by bringing it up and over your bow. The tail will be at the top of your bow. You can trim this to your liking when done. If you like tails on this bow shape it later by cutting it on an angle or however you wish.

Hold your bow tightly and clinch it in the middle and secure it with a piece of wire or elastic band. Secure to your choice of clippie.

Picture is of a Classic bow with no tails.
