

Layered Boutique Bow with Tails

Ribbons to Measure and cut (your ribbons of choice)

2 - 1.5" of pink and white striped ribbon

7/8" pink and white striped ribbon 24" long

35" of 1.5 brown grosgrain

Leave a couple of inches hanging of your ribbon then make a 3" loop as in picture #1.

Fold your ribbon over then bring your ribbon back towards you. Fold it under again to form another 3" loop, keep on going and repeat the same thing until you have 5 loops.

For the 6th loop we are going to take the ribbon, have it away from us and fold it under, spread your ribbon out a little so that you can form an 8 like shape like the Funky Fold Bow with your ribbon so that you now will have a total of 6 loops!

Fan out your ribbons a little bit.

Gather them in the center and wire it nice and tight.

Use your 7/8" pink and white striped ribbon 24" long. Make a cone like loop like in picture #7, leave a little bit of your ribbon before you make your loop.

Take your left ribbon tail and bend it over and place the ribbon in the center of the bow, This one is a toughie to explain that's why I added more pictures for this part so that if you couldn't understand how to make it you can look at the pictures.

Above is what you are looking for, one point on either side

Make another one using the same strand of ribbon that is connected to the other 2 cone like bows. Turn your bow on it's side and add in another cone like bow, still using the same ribbon.

Gather and wire tightly together.

Cut your tails on an angle like a V shape.

Put the funky loop bow on top of the brown bow and secure it well with wire.
