

Lacey Medallions AND Ruffled Medallions

Materials Needed

7" piece of lace or fabric if you want to make the ruffled medallion, the thickness of your choosing it really is a matter of what you would like but 1/12" is a nice size to work with like I am using here.

Needled and thread, please have your needle threaded and ready to go!
A rosette or rolled rose that you have made yourself from your instructions that are included just see the file "Rolled Rose" for that.

Take your fabric of lace and fold it in half

Make a running stitch through the top of your folded ribbon i.e.: under and over under and over in 1/8" to 1/4" increments.

Pull your thread tight to gather your lace of fabric and tie a couple of knots. Now open up your lace and there you have your medallion.

The pretty part! :) add in a silk flower or a rolled rosette that you have made all on your own with the instructions that are included! You can do so many things with these medallions! Keep them just the way they are and add a clippie in or add this on to a nice bow or a headband for a baby! Remember it can be as big or as small as you want it to be according to the width of your lace!
