

Bee-utiful BumbleBee

Cut yellow grosgrain ribbon 4" long. Glue one side and sandwich together. Cut a Bumblebee's body out of this approx. 2" long. What you will be cutting out will look sort of like a thinner version of an egg. Cut a black pipe clean 2" long.

To make the Bee's wings you will need $\frac{3}{8}$ " white grosgrain ribbon 3" long. Take your ribbon between your thumb and fore finger. Make a loop, pull your ribbon towards yourself and make another loop, cut off the excess.

Measure 2 - 2" of 3/8" black grosgrain ribbon, you will use these for your Bee's stripes. Glue one on at a time on the Bee's body. Now attach the wings that you just made above. Glue on one googly wiggle eye and bend and glue his pipe cleaner antenna on his head as if you are seeing a side view of a Bee. Secure your lined clippie of your choice to your Bee's back. Isn't he cute? :)
