

Center Rose Bow

Measure and cut 32" of 1.5" or 2.5" grosgrain ribbon
5" of 1" or 1.5" satin ribbon

Fold your ribbon in half, cut your tails on an angle

Lay your ribbon down flat in a snake pattern, make sure your ends are going in the opposite directions

From right to left pick up your ribbon and pleat as you go until your are done

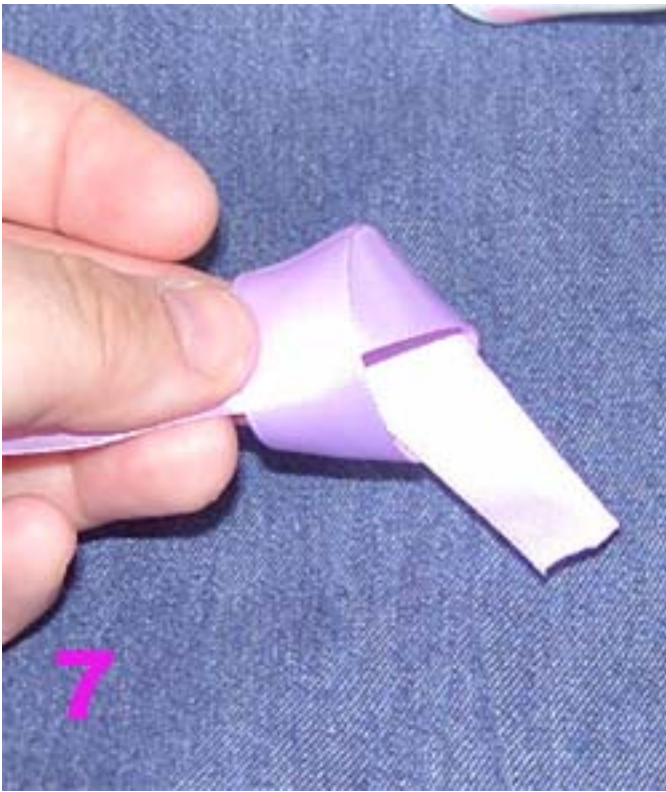

Secure well in the center by wrapping your wire around it several times nice and tight

Put your bow aside

Take your satin ribbon and make a knot, do not tighten it yet

Play around your ribbon so that all the satin is facing upwards and that your ribbon now has a peek in the center so it looks like a lil rose bud

Like so

Tie it around your bow and secure it more with a piece of wire
