

Basic Bow Tie Bow

Measure and cut 1 piece of 1.5" ribbon 18" long

Take a piece of your 18" ribbon fold one piece under then the other, make sure that at least 1/4" of your ribbon is overlapping each other. Wire the bow in the center. Make SURE you do this so that your bows do not come apart.

You can make your ribbon wider or shorter, this bow is perfect for toddlers and babies, just glue a little embellishment in the center. Puff up your bow by sticking some of your tissue paper in the loops. Spray with your fabric stiffner and let it dry before you pull the tissue paper out of your loops.
