

Spider Bow

The body is made much like our LadyBug. Very simple for the Spider though. Cut 4" of 1.5" black grosgrain ribbon. Fold over and glue together. When dry cut out a circle approx. 1" in diameter. You will need black krinkle ribbon. Measure and cut 3 strips of krinkle ribbon 2" long each. Glue each strip to the underside of the spiders body. Make sure that you have krinkle ribbon over hanging on each side! That will be his legs! When done glue some big googley eyes on his body. There's your SpoOky Spider, easy huh? Once you get the hang of the shaped method you will even surprise yourself how many wonderful ideas that you can come up with! :)
