

# Tommy The Turtle

## Materials Needed

2 pieces of green grosgrain 7/8" cut into 5" pieces

Wire

Hot Glue

Green paint pen, paint that is atleast 2 shades darker or lighter then your ribbon

2" of 3/8" green grosgrain ribbon, this will cover the wire when you attach his shell together

6" of grosgrain green ribbon, you will need to use this to cut out a head, 4 flippers and a tail.

Sorry I ran out of this color ribbon so this instruction is improvised, but you have made a lot of my characters so far so you know how the are built, I know you can do this one also! :o)

Make 2 bow ties, clinch in the center and wire tightly

Put the two bowties together and write them together

Take your pieces of 3/8" ribbon and wrap it over the wire in the center of the shell , glue on the underside of the turtles shell

Point your tails upward and glue a little piece of ribbon on the underside of the shell, do this on the other bow tie.

There is his shell, don't paint it yet though.

Cut out your head, 4 flippers and tail. Fray check.

Glue his head, flippers and tail onto the underside of his shell

Put on his googley eyes and a bow on his neck and paint spots all over his shell.

That's it! Tommy the Turtle :o)
