

Loopey Bubbly Bow

Materials Needed

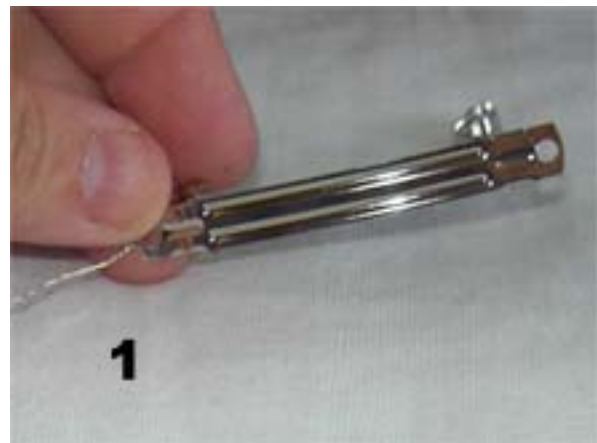

French clip, size of your choosing, the longer the clip the bigger the bow, the more loops you will need to make. Make 11 loops for a a 2 3/4" clip or according the fullness that you wish to have. Gently pop out the tension bar in your clip, save it you need to pop it back in after your hair bow is done.

Long piece of Wire.

****This is a GREAT hair bow to begin learning how to start making your bows with one long continuos piece of wire instead of cutting, wrapping, cutting and wrapping. One long continuos piece of wire makes it easier and faster for you. You can not use this technique in ALL of your bows but most you can, you will learn that through trial and error which ones you can use it in.****

1 1/2" ribbon of your choice approx. 1 and 1/2 yards

Take your wire and anchor it on your french clip by threading it through the hole and twisting it a few times.

Leave 5" of your ribbon hanging then begin by wrapping your wire three times around the piece of ribbon.

Make a 1"-1 1/2" loop and wrap your wire around the bottom of the loop that is on top of the french clip, make another loop the same size, all of your loops should be the same size, if you have trouble eyeing it don't worry just use something to measure each loop by like a piece of cardboard that you have cut.

Keep on going... make a loop, wrap the wire around the loop bottom and your clip, repeat these steps until you have made 11 loops or so.

See how you are continuing on making your loops and wrapping your wire? Photo 8 is a view of the back of your clip. When you get to the end of your clip and have made as many loops as you like, wrap your wire around it a few times to anchor it well, cut off the excess wire. Cut your ribbon tails in either a V shape or on the corner shape / like shown in photo 9.

That's it you did it! YAY! and you learned how to work with one continuous long piece of wire! woohoo! :)
