

Wavey Bow

Measure and cut 33" of 2.5" ribbon

7" of 1.5" or 2.5" ribbon, whichever you prefer

Please follow the instructions in the order in which they were placed, for this bow you will not need to pay no attention to this numbers.

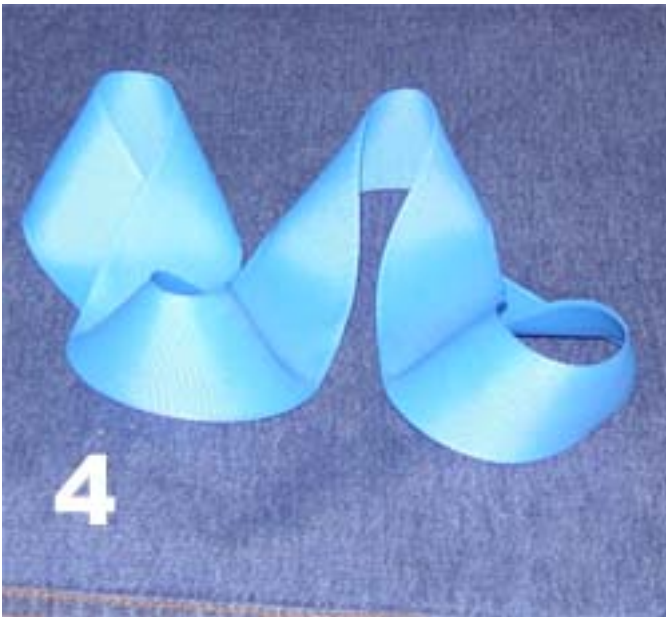

I like this bow a lot because you can add so many cute things in the center to show your very own style.

Fold your 33" ribbon in half cut them on an angle

Lay your ribbon down flat in a snake pattern like so. So that your ribbons are going in opposite directions.

Tuck the tails of your ribbons that you cut on an angle underneath your ribbons

From right to left begin pleating your ribbon and picking it up until done, make sure that the corners of your ribbon that you cut on an angle are secured well in your pleats or it will come un done

Wrap a piece of wire around the center a few times to secure it
